

# Subaru Oil Filter Anti-Drain Adapter SS-102-BK

## Installation Instructions:

For use on FA20/24 and FB16/20/25 engines

## Read instructions thoroughly prior to installation.

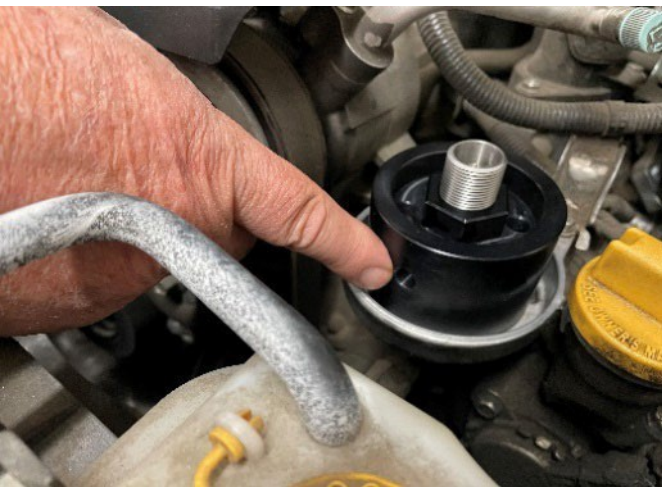

**Step 1:** Remove oil filter.

**Step 2:** Install adapter without base seal O-ring.  
Torque to 30 ft. lbs. using 1" Deep Socket.

**Step 3:** Establish port to be utilized for air valve.

**Step 4:** Remove adapter. Apply oil to hex plugs and install in two ports not utilized. (If using sealing tape, be sure tape is on treads only and not end of plug)

# Subaru Oil Filter Anti-Drain Adapter SS-102-BK

**Step 5:** Install Viton O-ring and lubricate with oil.  
Torque to 30 ft. lbs. using 1" Deep Socket.

**Step 6:** Install Schrader valve.

**Step 7:** Install an appropriate size oil filter that contains M20x1.5 threads. Subaru oil filters will fit this adapter. **Caution:** Make certain that filter/adapter height will not contact hood when closed.

**Step 8:** Install caution sticker if oil/filter change will be serviced by an oil service technician.

**Prior to servicing for oil and filter change**, remove oil filler cap and apply min 30/max 100 psi compressed air with air chuck for 2 seconds, this will evacuate oil filter for easy and clean oil filter removal.
